The Innovator IBD® ETF Leaders ETF (LDRS) stands alone in seeking to provide investors with an independently managed portfolio of top-ranking ETFs even as market conditions shift over time. LDRS is an ETF of ETFs based on the IBD® ETF Leaders Index. The Index rebalances monthly using IBD's time-tested research and analysis to offer a rules-based, dynamically-constructed, globally-allocated portfolio in a single-ticket ETF solution. It is the only issuer agnostic ETF of ETFs on the market today.

SIMPLIFY YOUR INVESTING No new accounts needed, easy to access, transparent, stay invested across all market environments	MANAGED ETF PORTFOLIO SOLUTION IN SINGLE-TRADE Tactical changes managed for you in a single ETF	DISTINCTIVELY TAX-EFFICIENT Most tax-efficient way to access a tactical global portfolio on the market today	IBD'S TIME-TESTED RESEARCH Complement existing portfolio allocation or use as a new core holding

THE IBD® ETF LEADERS RULES-BASED PROCESS

A TAX-EFFICIENT, GO-ANYWHERE STRATEGY

The IBD® ETF Leaders Index's monthly rebalance feature allows it to adapt to changing markets conditions. All of LDRS' tactical changes are handled within the ETF, meaning you can defer capital gains and maximize long-term returns. The index's investment strategy is unique; it moves across asset classes, geographies and themes by evaluating more than 1,000 ETFs, only investing in top performing ETFs. LDRS' tax-efficient ETF structure allows cross-asset-class moves without triggering a taxable event.

“In the ever growing automated, robo-constructed ETF managed portfolio space, LDRS stands apart by providing a layer of tax-efficiency to its high conviction, rules-based, go-anywhere strategy.”
 - Bruce Bond, CEO, Innovator

Investing involves risks. Principal loss is possible. There is no assurance that the Fund's investment objectives will be achieved. ETFs face numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Unlike mutual funds, ETFs may trade at a premium or discount to their net asset value. ETFs are bought and sold at market price and not individually redeemed from the fund. Brokerage commissions will reduce returns. It is not possible to invest directly in an index.

To the extent that the Index concentrates in the securities of issuers in a particular industry or sector, the Fund will also concentrate its investments to approximately the same extent. The Fund may be susceptible to loss due to adverse occurrences to the extent that the Fund's investments are concentrated in a particular issuer or issuers, region, market, industry, group of industries, sector or asset class.
