

INNOVATOR ETFs TRUST
(the “*TRUST*”)

INNOVATOR IBD[®] 50 ETF
INNOVATOR IBD[®] ETF LEADERS ETF
(the “*FUNDS*”)

SUPPLEMENT TO THE FUND’S PROSPECTUS AND STATEMENT OF ADDITIONAL INFORMATION
DATED MARCH 1, 2018

DATED JUNE 21, 2018

On June 20, 2018, at a special meeting of the Board of Directors of the Trust (the “*Board*”), the Board approved a Fund CCO and AMLO Agreement between Foreside Fund Officer Services, LLC (“*Foreside Officer Services*”) and the Trust under which Foreside Officer Services will perform certain compliance services for the Funds, including providing a chief compliance officer (“*CCO*”) to the Funds. Foreside Officer Services will replace Michael Wiederholt who provided similar compliance services as CCO to the Funds. Pursuant to new agreement, the Funds and Foreside Officer Services have designated James Nash as the CCO to the Funds. Effectively immediately, James Nash will replace Michael Wiederholt as each Fund’s CCO and all references to Michael Wiederholt are removed in their entirety.

Accordingly, the following revisions are made to the Statement of Additional Information:

- The final row of the table in the section entitled “Management of the Trust” is deleted and replaced in its entirety with the following:

NAME, ADDRESS AND YEAR OF BIRTH	POSITION AND OFFICES WITH TRUST	TERM OF OFFICE AND YEAR FIRST ELECTED OR APPOINTED	PRINCIPAL OCCUPATIONS DURING PAST 5 YEARS	NUMBER OF PORTFOLIO S IN THE INNOVATOR FUND COMPLEX OVERSEEN BY TRUSTEE	OTHER TRUSTEESHIPS OR DIRECTORSHIPS HELD BY TRUSTEE DURING THE PAST 5 YEARS
James Nash ⁽²⁾ c/o Innovator ETFs Trust II 10 High Street, Suite 302 Boston, MA 02110 Y.O.B.: 1981	Chief Compliance Officer and Anti- Money Laundering Officer	<ul style="list-style-type: none"> • Indefinite term • Since 2018 	Foreside Fund Officer Services, LLC, 2016 – present, Fund Chief Compliance Officer; JPMorgan Chase & Co., 2014 – 2016, Senior Associate, Regulatory Administration Advisor; Linedata Services, 2011 – 2014, Product Analyst	N/A	N/A

(2) Mr. Nash is an employee of Foreside Fund Officer Services, LLC, a wholly-owned subsidiary of the Fund’s principal underwriter.

2. The following is added as the final paragraph of the sub-section entitled “Management of the Trust – Risk Oversight”:

James Nash of Foreside Fund Officer Services, LLC (“*Foreside Officer Services*”) serves as CCO and Anti-Money Laundering Officer of the Trust. In a joint effort between the Trust and Foreside Officer Services to ensure the Trust complies with Rule 38a-1 under the 1940 Act, Foreside Officer Services has agreed to render services to the Trust by entering into a Fund CCO and AMLO Agreement (the “*CCO Services Agreement*”) with the Trust. Pursuant to the CCO Services Agreement, Foreside Officer Services designates, subject to the Trust’s approval, one of its own employees to serve as CCO of the Trust within the meaning of Rule 38a-1. Mr. Nash currently serves in such capacity under the terms of the CCO Services Agreement.

PLEASE KEEP THIS SUPPLEMENT WITH YOUR PROSPECTUS
AND STATEMENT OF ADDITIONAL INFORMATION FOR FUTURE REFERENCE

Prospectus

Innovator IBD[®] ETF Leaders ETF (NYSE Arca — LDRS)

December 13, 2017

Innovator IBD[®] ETF Leaders ETF (the “*Fund*”) is a series of Innovator ETFs Trust (the “*Trust*”) and an exchange-traded index fund. The Fund lists and principally trades its shares on NYSE Arca, Inc. (“*NYSE Arca*” or the “*Exchange*”).

NOT FDIC INSURED. MAY LOSE VALUE. NO BANK GUARANTEE.

The U.S. Securities and Exchange Commission (“*SEC*”) has not approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

INNOVATOR IBD[®] ETF LEADERS ETF

INVESTMENT OBJECTIVE

The Fund seeks to track, before fees and expenses, the performance of the IBD[®] ETF Leaders Index (the “*Index*”).

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund (“*Shares*”). Investors may pay brokerage commissions on their purchases and sales of Shares, which are not reflected in the table or the example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees ⁽¹⁾	0.60%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses ⁽²⁾	0.00%
Acquired Fund Fees and Expenses ⁽²⁾	0.56%
Total Annual Fund Operating Expenses	1.16%

- (1) The Fund’s investment adviser pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other service and license fees. However, the investment adviser is not responsible for distribution and service fees payable pursuant to a Rule 12b-1 plan, if any, brokerage commissions and other expenses connected with the execution of portfolio transactions, taxes, interest and extraordinary expenses.
- (2) Other Expenses and Acquired Fund Fees and Expenses are estimates based on the expenses the Fund expects to incur for the current fiscal year.

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

	1 Year	3 Years
	\$118	\$223

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund’s performance. Because the Fund has not yet commenced investment operations, no portfolio turnover information is available at this time.

PRINCIPAL INVESTMENT STRATEGIES

The Fund will normally invest at least 80% of its net assets (including investment borrowings) in the exchange-traded investment companies (“*Underlying Funds*”) that comprise the Index. The Fund generally invests in all of the securities comprising the Index in proportion to the weightings of the securities in the Index. The Fund, using an indexing investment approach, attempts to replicate, before fees and expenses, the performance of the Index. Penserra Capital Management LLC, the Fund’s investment sub-adviser, seeks a correlation of 0.95 or better (before fees and expenses) between the Fund’s performance and the performance of the Index; a figure of 1.00 would represent perfect correlation.

The Index is a rules-based index owned and developed by Investor’s Business Daily® (“*IBD*” or the “*Index Provider*”) designed to attempt to outperform the broader equity and fixed income markets. IBD uses proprietary relative strength analysis to select Underlying Funds across various asset classes that are showing market-leading relative strength. The Index may be composed of Underlying Funds that invest in any asset class, including foreign and domestic equity and fixed income securities, and, from time to time, other alternative asset classes. Underlying Funds may invest in securities issued by small-, mid- and large-capitalization companies located in either developed or emerging markets and in securities of any credit quality, including “junk” securities. The Underlying Funds comprising the Index may be passively or actively managed.

The initial universe for the Index is composed of all U.S.-listed exchange-traded funds (“*ETFs*”) registered under the Investment Company Act of 1940, as amended (the “*1940 Act*”). The universe does not include exchange-traded notes, inverse ETFs (ETFs that seek to provide a return that is the exact opposite of an index) with the exception of the ProShares Short S&P 500 ETF, leveraged ETFs (ETFs that seek to amplify the return of an index) and commodity ETFs. The selection universe is then narrowed by excluding Underlying Funds with the following characteristics:

1. Underlying Funds with an average daily trading volume of less than 100,000 over the previous 50 days;
2. Underlying Funds not trading above their average 6-month price; and
3. Underlying Funds with returns less than those of the S&P 500 Index over the course of the previous three months.

The remaining Underlying Funds are then ranked according to IBD's relative price strength rating methodology. "Relative strength" is an investing technique that seeks to determine the strongest performing securities by measuring certain factors, such as a security's relative performance against the overall market or a security's relative strength value, which is derived by comparing the rate of increase of the security's price as compared to that of a benchmark index. IBD utilizes relative strength to compare an Underlying Fund's stock price performance over the last twelve months (with performance over the three most recent months more heavily emphasized) against the over 8,000 foreign and domestic equity securities that comprise IBD's internal database. Each Underlying Fund is ranked according to its relative price performance and assigned a proprietary rating score from 1 (lowest) to 99 (highest). All Underlying Funds with a qualifying rating are included and equally weighted within the Index, subject to the limitations of Section 12(d)(1) of the 1940 Act (for additional information on the limitations of Section 12(d)(1), see "Fund Investments—Exchange-Traded Funds"). If less than three Underlying Funds have a qualifying rating, the Index will be composed of Underlying Funds that invest principally in cash or cash equivalents to bring the number of components to three until the next Index reconstitution and rebalance date.

The Index has also been designed to account for the tendency of Underlying Funds to exhibit mean reversion after periods of outsized price appreciation. Mean reversion is the assumption that an Underlying Fund's price will tend to move to the average price over time. IBD's proprietary methodology has indicated a level of price growth at which mean reversion is more likely. If the Index exhibits price appreciation up to this level, the Index will be composed of Underlying Funds that principally invest in cash or cash equivalents until the next Index reconstitution and rebalance date. For more information, please see "Index Information."

Under normal conditions, the Index will be reconstituted and rebalanced on the last trading day of each month. However, if the S&P 500 Index experiences gains of greater than 3% in a given week, the Index will be reconstituted and rebalanced on the final trading day of that week. As of November 30, 2017, the Index was composed of 26 Underlying Funds. However, given that the Index is generally reconstituted and rebalanced monthly, this may not be a current reflection of the Index's holdings.

The Fund is classified as "non-diversified" under the 1940 Act. To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent.

PRINCIPAL Risks

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund's investment objectives will be achieved.

Authorized Participation Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other

market participants). To the extent that authorized participants exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem “Creation Units” (as defined in “Purchase and Sale of Fund Shares,”) Shares may be more likely to trade at a premium or discount to net asset value (“NAV”) and possibly face trading halts and/or delisting.

Concentration Risk. To the extent that the Index concentrates in the securities of issuers in a particular industry or sector, the Fund will also concentrate its investments to approximately the same extent. The Fund may be susceptible to loss due to adverse occurrences to the extent that the Fund’s investments are concentrated in a particular issuer or issuers, region, market, industry, group of industries, sector or asset class.

Cyber Security Risk. As the use of Internet technology has become more prevalent in the course of business, the investment industry has become more susceptible to potential operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss.

Exchange-Traded Fund Risk. An ETF trades like common stock and represents a portfolio of securities. The risks of owning an exchange-traded fund generally reflect the risks of owning the underlying securities, although lack of liquidity in an exchange-traded fund could result in it being more volatile and ETFs have management fees that increase their costs.

Fluctuation of Net Asset Value Risk. Shares trade on the Exchange at their market price rather than their NAV. The market price may be at, above or below the Fund’s NAV. Differences in market price and NAV may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. These differences can be especially pronounced during times of market volatility or stress. During these periods, the demand for Shares may decrease considerably and cause the market price of Shares may deviate significantly from NAV.

Fund of Funds Risk. Because the Fund is a fund of funds, its investment performance largely depends on the investment performance of the Underlying Funds in which it invests. An investment in the Fund is subject to the risks associated with the Underlying Funds that comprise the Index. The Fund will pay indirectly a proportional share of the fees and expenses of the Underlying Funds in which it invests, including their investment advisory and administration fees, while continuing to pay its own unitary management fee. As a result, shareholders will absorb duplicate levels of fees with respect to investments in the Underlying Funds.

Index Provider Risk. The Fund seeks to achieve returns that generally correspond, before fees and expenses, to the performance of their Index, as published by their Index Provider. There is no assurance that the Index Provider will compile its Index accurately, or that the Index will be determined, composed or calculated accurately. While the Index Provider gives descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or

accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that its Index will be in line with its methodology.

Limitations of Intraday Indicative Value Risk. The Exchange intends to disseminate the approximate per share value of the Fund's published basket of portfolio securities every 15 seconds (the "*intraday indicative value*" or "*IIV*"). The IIV should not be viewed as a "real-time" update of the NAV per Share because (i) the IIV may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day, (ii) the calculation of NAV may be subject to fair valuation at different prices than those used in the calculations of the IIV, (iii) unlike the calculation of NAV, the IIV does not take into account Fund expenses, and (iv) the IIV is based on the published basket of portfolio securities and not on the Fund's actual holdings. The IIV calculations are based on local market prices and may not reflect events that occur subsequent to the local market's close, which could affect premiums and discounts between the IIV and the market price of the Shares. The Fund, Adviser and Sub-Adviser are not involved in, or responsible for, any aspect of the calculation or dissemination of the IIV and do not make any warranty as to the accuracy of these calculations.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or Fund Shares in general may fall in value. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Shares could decline in value or underperform other investments.

New Fund Risk. The Fund currently has fewer assets than larger funds, and like other relatively new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs operating expenses not applicable to the Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. In addition, the performance of the Fund and the Index may vary due to asset valuation differences and differences between the Fund's portfolio and the Index resulting from legal restrictions, cost or liquidity constraints.

Non-Diversification Risk. The Fund is classified as “non-diversified” under the 1940 Act. As a result, the Fund is only limited as to the percentage of its assets which may be invested in the securities of any one issuer by the diversification requirements imposed by the Internal Revenue Code of 1986, as amended (the “Code”). The Fund may invest a relatively high percentage of its assets in a limited number of issuers. As a result, the Fund may be more susceptible to a single adverse economic or regulatory occurrence affecting one or more of these issuers, experience increased volatility and be highly invested in certain issuers.

Passive Investment Risk. The Fund invests in the securities included in the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets, except in connection with the Index’s risk reduction mechanism. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Portfolio Turnover Risk. High portfolio turnover (higher than 100%) may result in increased transaction costs to the Fund, including brokerage commissions, dealer markups and other transaction costs on the sale of the securities and on reinvestment in other securities, as well as possible increased taxable distributions.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Trading Issues Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange “circuit breaker” rules. Market makers are under no obligation to make a market in the Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. Initially, due to the small asset size of the Fund, it may have difficulty maintaining its listings on the Exchange.

Underlying Funds Risk. An investment in the Fund is subject to the risks associated with the Underlying Funds that compose the Index. As such, the Fund may be subject to the following risks as a result of its investments in the the Underlying Funds:

American Depositary Receipts Risk. ADRs are subject to fluctuations in foreign currencies and foreign investment risks, such as political and financial instability, less liquidity and greater volatility, lack of uniform accounting, auditing and financial reporting standards and increased price volatility. In addition, ADRs may not track the price of the underlying foreign securities, and their value may change materially at times when U.S. markets are not open for trading.

Credit Risk. Credit risk is the risk that an issuer of a security will be unable or unwilling to make dividend, interest and/or principal payments when due and the related risk that the value of such security may decline because of concerns about the issuer's ability to make such payments.

Emerging Markets Risk. Emerging markets may be more likely to experience inflation risk, political turmoil and rapid changes in economic conditions than more developed markets. Emerging markets often have less uniformity in accounting and reporting requirements, unreliable securities valuation and greater risk with custody of securities.

Equity Securities Risk. Equity securities may decline in value because of declines in the price of a particular holding or the broad stock market. Such declines may relate directly to the issuer of a security or broader economic or market events, including changes in interest rates.

Fixed Income Securities Risk. Holders of fixed income securities will be affected by changes in interest rates, the creditworthiness of the issuer and other factors. An increase in prevailing interest rates typically causes the value of existing debt securities to fall and often has a greater impact on longer-duration debt securities and higher quality debt securities. Falling interest rates will cause the holder of fixed income securities to reinvest the proceeds of securities that have been repaid by the issuer at lower interest rates.

Foreign Securities Risk. Investments in securities of foreign companies (particularly in emerging markets) can be more volatile than investments in U.S. companies. Diplomatic, political, or economic developments, including nationalization or appropriation, could affect investments in foreign companies. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar.

High Yield Securities Risk. High yield securities, or "junk" bonds, are subject to greater market fluctuations and risk of loss than securities with higher ratings, and therefore, may be highly speculative. These securities are issued by companies that may have limited operating history, narrowly focused operations, and/or other impediments to the timely payment of periodic interest and principal at maturity. If the economy slows down or dips into recession, the issuers of high yield securities may not have sufficient resources to continue making timely payment of periodic interest and principal at maturity. The market for high yield securities is generally smaller and less liquid than that for investment grade securities. High yield securities are generally not listed on a national securities exchange but trade in the over-the-counter markets. Due to the smaller, less liquid market for high yield securities, the bid-offer spread on such securities is generally greater than it is for investment grade securities and the purchase or sale of such securities may take longer to complete. In general, high yield securities may have a greater risk of default than other types of securities.

Income Risk. The income of the Underlying Funds could decline due to falling market interest rates. This is because, in a falling interest rate environment, the Underlying Funds generally will have to invest the proceeds from sales of their shares, as well as the proceeds

from maturing portfolio securities, or portfolio securities that have been called, in lower-yielding securities.

Interest Rate Risk. Interest rate risk is the risk that the value of the debt securities will decline because of rising market interest rates. Interest rate risk is generally lower for shorter term debt securities and higher for longer term debt securities.

Preferred Securities Risk. Preferred securities are typically subordinated to bonds and other debt instruments in a company's capital structure, in terms of priority to corporate income, and therefore will be subject to greater credit risk than those debt instruments. Preferred securities are also subject to credit risk, interest rate risk and income risk.

Small- and Mid- Capitalization Company Risk. Generally, small- or mid- capitalization companies, which are often less seasoned, have more potential for rapid growth. However, they often involve greater risk than large cap companies and these risks are passed on to funds that invest in them. These companies may not have the management experience, financial resources, product diversification and competitive strengths of larger companies.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.

PERFORMANCE

As of the date of this prospectus, the Fund has not commenced operations and therefore does not have a performance history. Once available, the Fund's performance information will be accessible on the Fund's website at www.innovatoretfs.com and will provide some indication of the risks of investing in the Fund.

MANAGEMENT

Investment Adviser

Innovator Capital Management, LLC (“*Innovator*” or the “*Adviser*”)

Investment Sub-Adviser

Penserra Capital Management LLC (“*Penserra*” or the “*Sub-Adviser*”)

Portfolio Managers

The following persons serve as the portfolio managers of the Fund.

- Dustin Lewellyn
- Ernesto Tong
- Anand Desai

The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund and have served in such capacity since December 2017.

PURCHASE AND SALE OF FUND SHARES

The Fund will issue and redeem Shares at NAV only with authorized participants (“APs”) that have entered into agreements with the Fund’s distributor and only in Creation Units (large blocks of 50,000 Shares) or multiples thereof (“*Creation Unit Aggregations*”), in exchange for the deposit or delivery of a basket of securities in which the Fund invests. The Fund may issue and redeem Shares in exchange for cash at a later date but has no current intention of doing so. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may be purchased and sold only on a national securities exchange through brokers. Shares are expected to be listed for trading on the Exchange and because the Shares will trade at market prices rather than NAV, Shares may trade at prices greater than NAV (at a premium), at NAV, or less than NAV (at a discount).

TAX INFORMATION

The Fund’s distributions will generally be taxable as ordinary income, returns of capital or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), Innovator and Foreside Fund Services, LLC, the Fund’s distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Additional Information About the Fund's Principal Investment Strategies

The Fund's investment objective may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval upon 60 days' written notice to shareholders. Additionally, the Fund may liquidate and terminate at any time without shareholder approval.

The Fund uses an "indexing" investment approach to attempt to replicate, before fees and expenses, the performance of the Index. The Adviser seeks correlation over time of 0.95 or better between the Fund's performance and the performance of the Index; a figure of 1.00 would represent perfect correlation. Another means of evaluating the relationship between the returns of the Fund and its Index is to assess the "tracking error" between the two. Tracking error means the variation between the Fund's annual return and the return of the Index, expressed in terms of standard deviation. The Fund seeks to have a tracking error of less than 5%, measured on a monthly basis over a one-year period by taking the standard deviation of the difference in the Fund's returns versus the Index's returns. There is no guarantee that the tracking error will not exceed 5%. The Fund generally invests in all of the securities comprising the Index in proportion to the weightings of the securities in the Index.

Investor's Business Daily® is the index provider to the Fund. The "IBD®" mark has been licensed to the Adviser by IBD for use in connection with the Fund under certain circumstances. The Adviser, in turn, has sublicensed to the Fund its rights to use the mark pursuant to a Sublicense Agreement. The Fund is not sponsored, endorsed or sold by IBD. IBD makes no representation regarding the advisability of investing in the Fund. Additional information about the construction and calculation of the Index is set forth below in the section entitled "Index Provider."

Fund Investments

Principal Investments

Exchange-Traded Funds

ETFs are registered investment companies that trade on a securities exchange. The shares of ETFs may, at times, trade at a premium or discount to their net asset value. In addition, the Fund will incur brokerage costs when purchasing and selling shares of ETFs. As a shareholder in an ETF, the Fund will bear its ratable share of the ETF's expenses, and would remain subject to payment of the ETF's advisory and administrative fees with respect to assets so invested. Shareholders would therefore be subject to duplicative expenses. Securities of ETFs may be leveraged, in which case the value and/or yield of such securities will tend to be more volatile than securities of unleveraged securities.

Generally, investments in ETFs are subject to statutory limitations prescribed by the 1940 Act. These limitations include a prohibition on the Fund acquiring more than 3% of the voting shares of any other investment company, a prohibition on investing more than 5% of the Fund's total assets in the securities of any one investment company or more than 10% of its total assets, in the aggregate, in investment company securities. Many ETFs, however, have obtained exemptive relief from the SEC to permit unaffiliated funds to invest in the ETFs' shares beyond these

statutory limitations, subject to certain conditions and pursuant to a contractual arrangement between the ETFs and the investing fund. The Fund may rely on these exemptive orders in order to invest in unaffiliated ETFs, if necessary, beyond the foregoing statutory limitations.

Cash Equivalents and Short-Term Investments

The Fund may invest in securities with maturities of less than one year or cash equivalents, or it may hold cash. The percentage of the Fund invested in such holdings varies and depends on several factors, including market conditions. During the initial invest-up period and during periods of high cash inflows or outflows, if market conditions are not favorable, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or it may hold cash. During such periods, the Fund may not be able to achieve its investment objectives. For more information on eligible short-term investments, see the statement of additional information.

DISCLOSURE OF PORTFOLIO HOLDINGS

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI, which is available at www.innovatoretfs.com.

Additional Risks of Investing in the Fund

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objective. Before you invest, you should consider the following supplemental disclosure pertaining to the Principal Risks set forth above as well as additional Non-Principal Risks set forth below in this prospectus.

PRINCIPAL Risks

Authorized Participation Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Concentration Risk. In following its methodology, the Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or a sector. To the extent that the Index concentrates in the securities of issuers in a particular industry or sector, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in an industry or sector, the Fund faces more risks than if it were diversified broadly over numerous industries or sectors. Such industry-based risks, any of which may adversely affect the companies in which the Fund invests, may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources, adverse labor relations, political or world events; obsolescence of technologies; and increased

competition or new product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, such industry or sector may be out of favor and underperform other industries or the market as a whole. Information about the Fund's exposure to a particular industry is available in the Fund's Annual and Semi-Annual Reports to Shareholders, as well as on its Forms N-Q as filed with the SEC.

Cyber Security Risk. As the use of Internet technology has become more prevalent in the course of business, the investment industry has become more susceptible to potential operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. The Fund has established risk management systems designed to reduce the risks associated with cyber security. However, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Exchange-Traded Fund Risk. In addition to the risks associated with the underlying assets held by an ETF, investments in ETFs are subject to the following additional risks: (1) an ETF's shares may trade above or below its net asset value; (2) an active trading market for the ETF's shares may not develop or be maintained; (3) trading an ETF's shares may be halted by the listing exchange; (4) a passively managed ETF may not track the performance of the reference asset; and (5) a passively managed ETF may hold troubled securities. Investment in ETFs may involve duplication of management fees and certain other expenses, as the Fund indirectly bears its proportionate share of any expenses paid by the exchange-traded funds in which it invests. Further, certain exchange-traded funds in which the Fund may invest are leveraged, which may result in economic leverage, permitting the Fund to gain exposure that is greater than would be the case in an unlevered instrument and potentially resulting in greater volatility.

Fluctuation of Net Asset Value Risk. The NAV of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for Shares on the Exchange. The Fund's investment adviser cannot predict whether Shares will trade below, at or above their NAV because the Shares trade on the Exchange at market prices and not at NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. However, given that Shares can only be purchased and redeemed either in-kind or for cash in Creation Units, and only to and from broker-dealers and large institutional investors that have entered into participation agreements (unlike shares of closed-end funds,

which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), the investment adviser believes that large discounts or premiums to the NAV of Shares should not be sustained.

Fund of Funds Risk. Because the Fund is a fund of funds, its investment performance largely depends on the investment performance of the Underlying Funds in which it invests. An investment in the Fund is subject to the risks associated with the Underlying Funds that comprise the Index. The Fund will pay indirectly a proportional share of the fees and expenses of the Underlying Funds in which it invests, including their investment advisory and administration fees, while continuing to pay its own unitary management fee. As a result, shareholders will absorb duplicate levels of fees with respect to investments in the Underlying Funds. In addition, at times certain segments of the market represented by constituent Underlying Funds in the Index may be out of favor and underperform other segments.

Index Provider Risk. The Fund seeks to achieve returns that generally correspond, before fees and expenses, to the performance of their Index, as published by their Index Provider. There is no assurance that the Index Provider will compile its Index accurately, or that the Index will be determined, composed or calculated accurately. While the Index Provider gives descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that its Index will be in line with its methodology. Errors made by the Index Provider with respect to the quality, accuracy and completeness of the data within the Index may occur from time to time and may not be identified and corrected by the Index Provider for a period of time, if at all. Therefore, gains, losses or costs associated with Index Provider errors will generally be borne by the Fund and its shareholders.

Limitations of Intraday Indicative Value Risk. The Exchange intends to disseminate the approximate per share value of the Fund's published basket of portfolio securities every 15 seconds. The IIV should not be viewed as a "real-time" update of the NAV per Share because (i) the IIV may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day, (ii) the calculation of NAV may be subject to fair valuation at different prices than those used in the calculations of the IIV, (iii) unlike the calculation of NAV, the IIV does not take into account Fund expenses, and (iv) the IIV is based on the published basket of portfolio securities and not on the Fund's actual holdings. The IIV calculations are based on local market prices and may not reflect events that occur subsequent to the local market's close, which could affect premiums and discounts between the IIV and the market price of the Shares. The Fund, Adviser and Sub-Adviser are not involved in, or responsible for, any aspect of the calculation or dissemination of the IIV and do not make any warranty as to the accuracy of these calculations.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or

step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. The securities in the Index are subject to market fluctuations, and the Fund could lose money due to short-term market movements and over longer periods during market downturns. You should anticipate that the value of the Shares will decline, more or less, in correlation with any decline in value of the securities in the Index. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or due to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected.

New Fund Risk. The Fund currently has fewer assets than larger funds, and like other relatively new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. Also, during the initial invest-up period, the Fund may depart from its principal investment strategies and invest a larger amount or all of its assets in cash equivalents or it may hold cash.

Non-Correlation Risk. As with all index funds, the performance of the Fund and the Index may vary somewhat for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs, while also managing cash flows and potential operational inefficiencies, not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index or may be subject to pricing differences, differences in the timing of dividend accruals, operational inefficiencies and the need to meet various new or existing regulatory requirements. For example, it may take several business days for additions and deletions to the Index to be reflected in the portfolio composition of the Fund. The use of sampling techniques may affect the Fund's ability to achieve close correlation with the Index. The Fund using a representative sampling strategy generally can be expected to have a greater non-correlation risk and this risk may be heightened during times of market volatility or other unusual market conditions.

Non-Diversification Risk. The Fund is classified as "non-diversified" under the 1940 Act. As a result, the Fund is only limited as to the percentage of its assets which may be invested in the securities of any one issuer by the diversification requirements imposed by the Code. The Fund may invest a relatively high percentage of its assets in a limited number of issuers. As a result, the Fund may be more susceptible to a single adverse economic or regulatory occurrence affecting one or more of these issuers, experience increased volatility and be highly invested in certain issuers.

Passive Investment Risk. The Fund is not actively managed. The Fund invests in securities included in its Index regardless of their investment merit. Unlike many investment companies, the Fund does not utilize an investing strategy that seeks returns in excess of the Index.

Therefore, it would not necessarily buy or sell a security unless that security is added or removed, respectively, from the Index, even if that security generally is underperforming.

Portfolio Turnover Risk. High portfolio turnover (higher than 100%) may result in increased transaction costs to the Fund, including brokerage commissions, dealer markups and other transaction costs on the sale of the securities and on reinvestment in other securities, as well as possible increased taxable distributions.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Trading Issues Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange “circuit breaker” rules. Market makers are under no obligation to make a market in the Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. Initially, due to the small asset size of the Fund, it may have difficulty maintaining its listings on the Exchange.

Underlying Funds Risk. An investment in the Fund is subject to the risks associated with the Underlying Funds that comprise the Index. As such, the Fund may be subject to the following risks as a result of its investments in the the Underlying Funds:

American Depositary Receipts Risk. ADRs are subject to fluctuations in foreign currencies and foreign investment risks, such as political and financial instability, less liquidity and greater volatility, lack of uniform accounting, auditing and financial reporting standards and increased price volatility. In addition, ADRs may not track the price of the underlying foreign securities, and their value may change materially at times when U.S. markets are not open for trading. Holders of unsponsored depositary receipts generally bear all the costs associated with establishing the unsponsored depositary receipts. In addition, the issuers of the securities underlying unsponsored depositary receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depositary receipts.

Credit Risk. Credit risk is the risk that an issuer of a security will be unable or unwilling to make dividend, interest and/or principal payments when due and the related risk that the value of such security may decline because of concerns about the issuer’s ability to make such payments.

Emerging Markets Risk. Investments in emerging markets or developing countries are subject to all of the risks of international investing generally, and have additional heightened risks due to a lack of established legal, political, business and social frameworks to support securities markets, including: more restrictive national policies on foreign investment, including restrictions on investment in issuers or industries deemed sensitive to national interests; less familiarity with a capital market structure or market-oriented economy and more widespread corruption and fraud; higher rates of inflation and more rapid and extreme fluctuations in inflation rates; greater sensitivity to interest rate changes; increased volatility in currency exchange rates and potential for currency devaluations and/or currency controls; greater debt burdens relative to the size of the economy; and more delays in settling portfolio transactions and heightened risk of loss from share registration and custody practices. There is also a higher possibility of the devaluation of a country's currency, a downgrade in the credit ratings of issuers in such country, or a decline in the value and liquidity of securities of issuers in that country if the U.S., other nations or other governmental entities (including supranational entities) impose sanctions on issuers that limit or restrict foreign investment, the movement of assets or other economic activity in the country due to political, military or regional conflicts or due to terrorism or war. Security prices in emerging markets can also be significantly more volatile than those in more developed markets, reflecting the greater uncertainties of investing in less established markets and economies. These risks are inherently passed on to the company's shareholders, including the Fund, and in turn, to the Fund's shareholders.

Equity Securities Risk. Investments in equity securities are subject to market risks that may cause their prices to fluctuate over time. The value of your investment in the Fund is based on the market prices of the securities to which the Fund has exposure. These prices change daily due to economic and other events that affect particular companies and other issuers or the market as a whole. Historically, the equity markets have moved in cycles so that the value of the Fund's equity securities may fluctuate from day-to-day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments and the prices of their securities may suffer a decline in response. These factors contribute to price volatility which is the principal risk of investing in the Fund.

Fixed Income Securities Risk. Holders of fixed income securities will be affected by changes in interest rates, the creditworthiness of the issuer and other factors. An increase in prevailing interest rates typically causes the value of existing debt securities to fall and often has a greater impact on longer-duration debt securities and higher quality debt securities. Falling interest rates will cause the holder of fixed income securities to reinvest the proceeds of securities that have been repaid by the issuer at lower interest rates. Falling interest rates may also reduce the holder's distributable income because interest payments on floating rate debt instruments held by the holder will decline. The holder could lose money on investments in fixed income securities if the issuer or borrower fails to meet its obligations to make interest payments and/or to repay principal in a timely manner. Changes in an issuer's financial strength, the market's perception of such strength or in the credit rating of the issuer or the security may affect the value of debt securities. A credit analysis may fail to anticipate such changes, which could result in buying a fixed income security at an inopportune time.

Foreign Securities Risk. Investments in securities of foreign companies (particularly in emerging markets) can be more volatile than investments in U.S. companies. Diplomatic, political, or economic developments, including nationalization or appropriation, could affect investments in foreign companies. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign companies or governments generally are not subject to uniform accounting, auditing, and financial reporting standards comparable to those applicable to domestic U.S. companies or governments. Transaction costs are generally higher than those in the U.S. and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities.

High Yield Securities Risk. High yield securities, or “junk” bonds, are subject to greater market fluctuations and risk of loss than securities with higher ratings, and therefore, may be highly speculative. These securities are issued by companies that may have limited operating history, narrowly focused operations, and/or other impediments to the timely payment of periodic interest and principal at maturity. If the economy slows down or dips into recession, the issuers of high yield securities may not have sufficient resources to continue making timely payment of periodic interest and principal at maturity. The market for high yield securities is generally smaller and less liquid than that for investment grade securities. High yield securities are generally not listed on a national securities exchange but trade in the over-the-counter markets. Due to the smaller, less liquid market for high yield securities, the bid-offer spread on such securities is generally greater than it is for investment grade securities and the purchase or sale of such securities may take longer to complete. In general, high yield securities may have a greater risk of default than other types of securities.

Income Risk. The income of the Underlying Funds could decline due to falling market interest rates. This is because, in a falling interest rate environment, the Underlying Funds generally will have to invest the proceeds from sales of their shares, as well as the proceeds from maturing portfolio securities, or portfolio securities that have been called, in lower-yielding securities.

Interest Rate Risk. Interest rate risk is the risk that the value of fixed income securities will decline because of rising market interest rates. Interest rate risk is generally lower for shorter term debt securities and higher for longer term debt securities. Duration is a measure of the expected price volatility of a debt security as a result of changes in market rates of interest, based on, among other factors, the weighted average timing of the debt security’s expected principal and interest payments. In general, duration represents the expected percentage change in the value of a security for an immediate 1% change in interest rates. Therefore, prices of fixed income securities with shorter durations tend to be less sensitive to interest rate changes than debt securities with longer durations. As the value of a fixed income security changes over time, so will its duration.

Preferred Securities Risk. An investment in preferred securities involves the further risks not associated with an investment in common stocks set forth below.

- *Limited Voting Rights.* Generally, holders of preferred securities have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer's board. Generally, once the issuer pays all the arrearages, the preferred security holders no longer have voting rights.
- *Special Redemptions Rights.* In certain circumstances, an issuer of preferred securities may redeem the securities prior to a specified date. For instance, for certain types of preferred securities, a redemption may be triggered by a change in federal income tax or securities laws. As with call provisions, a special redemption by the issuer may negatively impact the return of the security.
- *Deferral.* Preferred securities may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. For instance, if the Fund owns a preferred security that is deferring its distributions, the Fund may be required to report income for federal income tax purposes although it has not yet received such income in cash.
- *Subordination.* Preferred securities are subordinated to bonds and other debt instruments in a company's capital structure in terms of priority to corporate income and liquidation payments and therefore will be subject to greater credit risk than those debt instruments.
- *Liquidity.* Preferred securities may be substantially less liquid than many other securities, such as common stocks or U.S. government securities.

Small- and Mid- Capitalization Company Risk. Generally, small- or mid- capitalization companies, which are often less seasoned, have more potential for rapid growth. However, they often involve greater risk than large cap companies and these risks are passed on to funds that invest in them. These companies may not have the management experience, financial resources, product diversification and competitive strengths of larger companies. Therefore, the securities of small-cap and mid-cap companies are generally more volatile than the securities of larger, more established companies.

Non-PRINCIPAL Risks

Cash Management and Defensive Investing Risk. The value of the investments held by the Fund for cash management or defensive investing purposes can fluctuate. Like other fixed income securities, they are subject to risk, including market, interest rate and credit risk. If the Fund holds cash uninvested it will be subject to the credit risk of the depository institution holding the cash. If the Fund holds cash uninvested, the Fund will not earn income on the cash.

Inflation Risk. Inflation may reduce the intrinsic value of increases in the value of the Fund. Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions.

Legislation and Litigation Risk. Legislation or litigation that affects the value of securities held by the Fund may reduce the value of the Fund. From time to time, various legislative initiatives are proposed that may have a negative impact on certain securities in which the Fund invests. In addition, litigation regarding any of the securities owned by the Fund may negatively impact the value of the Shares. Such legislation or litigation may cause the Fund to lose value or may result in higher portfolio turnover if the Adviser determines to sell such a holding.

Management of the Fund

The Fund is a series of Innovator ETFs Trust, an investment company registered under the 1940 Act. The Fund is treated as a separate fund with its own investment objectives and policies. The Trust is organized as a Delaware statutory trust. The Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with the Adviser, Sub-Adviser, custodian and fund administrative and accounting agent.

Investment Adviser

Innovator Capital Management, LLC, 120 North Hale Street, Suite 200, Wheaton, Illinois 60187, serves as the Fund's investment adviser. As of December 1, 2017, Innovator served as the investment adviser to two registered investment companies, with assets under management of greater than \$250 million. In its capacity as Adviser to the Fund, Innovator has overall responsibility for selecting and monitoring the Fund's investments and managing the Fund's business affairs.

Investment Sub-Adviser

Penserra Capital Management LLC, 140 Broadway, 26th Floor, New York, NY 10005, serves as the Fund's investment sub-adviser. Penserra has responsibility for managing the Fund's investment program in pursuit of its investment objective.

Portfolio Managers

Dustin Lewellyn, CFA. Mr. Lewellyn has been Chief Investment Officer with Penserra since 2012. He was President and Founder of Golden Gate Investment Consulting LLC from 2011 through 2015. Prior to that, Mr. Lewellyn was a managing director at Charles Schwab Investment Management, Inc. ("CSIM"), which he joined in 2009, and head of portfolio management for Schwab ETFs. Prior to joining CSIM, he worked for two years as director of ETF product management and development at a major financial institution focused on asset and wealth management. Prior to that, he was a portfolio manager for institutional clients at a financial services firm for three years. In addition, he held roles in portfolio operations and product management at a large asset management firm for more than 6 years.

Ernesto Tong, CFA. Mr. Tong has been a Managing Director with Penserra since 2015. Prior to that, Mr. Tong spent seven years a vice president at Blackrock, where he was a portfolio manager for a number of the iShares ETFs, and prior to that, he spent two years in the firm's index research group.

Anand Desai. Mr. Desai has been an Associate with Penserra since 2015. Prior to that, Mr. Desai was a portfolio fund accountant at State Street for five years.

For additional information concerning Innovator and Penserra, including a description of the services provided to the Fund, please see the Fund's statement of additional information. Additional information regarding the portfolio manager's compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of Shares may also be found in the statement of additional information.

MANAGEMENT FEE

Pursuant to an investment advisory agreement between Innovator and the Trust (the "*Investment Management Agreement*"), the Fund has agreed to pay an annual unitary management fee to Innovator in an amount equal to 0.60% of its average daily net assets. This unitary management fee is designed to pay the Fund's expenses and to compensate Innovator for the services it provides to the Fund.

Out of this unitary management fee, Innovator pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other service and license fees. However, the Adviser is not responsible for distribution and service fees payable pursuant to a Rule 12b-1 plan, if any, brokerage commissions and other expenses connected with the execution of portfolio transactions, taxes, interest, and extraordinary expenses. The Adviser's management fee is designed to pay the Fund's expenses and to compensate the Adviser for providing services to the Fund.

Pursuant to an investment sub-advisory agreement between Innovator, Penserra and the Trust (the "*Investment Sub-Advisory Agreement*"), Penserra receives an annual fee equal to the greater of \$20,000 or 0.05% of the average daily net assets of the Fund until the Fund reaches \$500 million in assets. The Adviser is responsible for paying the entire amount of the Sub-Adviser's fee for the Fund. The Fund does not directly pay the Sub-Adviser. The Adviser is responsible for paying the entire amount of the Sub-Adviser's fee for the Fund. The Fund does not directly pay the Sub-Adviser.

A discussion regarding the basis for the Trust's Board of Director's approval of the Investment Management Agreement and Investment Sub-Advisory Agreement on behalf of the Fund will be available in the Fund's Semi-Annual Report to shareholders for the fiscal period ended April 30, 2018.

Manager of Managers Structure. The Fund and the Adviser have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval ("*Manager of Managers Structure*"). Under the Manager of Managers Structure, the Adviser has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund's sub-advisers and recommending to the Board their hiring, termination, or replacement. The SEC order does not apply to any sub-adviser that is affiliated with the Fund or the Adviser.

The Manager of Managers Structure enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. The Manager of Managers Structure does not permit an increase in the advisory fees payable by the Fund without shareholder approval. Shareholders will be notified of any changes made to the sub-advisers or sub-advisory agreements within 90 days of the changes.

How to Buy and Sell Shares

The Fund issues or redeems its Shares at NAV per Share only in Creation Units. Most investors will buy and sell Shares in secondary market transactions through brokers. Shares will be listed for trading on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly traded shares. Share prices are reported in dollars and cents per Share. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. Because Shares trade at market price rather than NAV, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

The Shares trade under the symbol LDRS.

BOOK ENTRY

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or “street name” form.

FUND SHARE TRADING PRICES

The trading prices of Shares on the Exchange may differ from the Fund’s daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

The approximate value of Shares, an amount representing on a per Share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares and an estimated cash component, will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value and the Fund does not make any warranty as to its accuracy.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

Shares may be purchased and redeemed directly from the Fund only in Creation Units by APs that have entered into agreements with the Fund’s distributor. The vast majority of trading in Shares occurs on the secondary market and does not involve the Fund directly. In-kind purchases and redemptions of Creation Units by APs and cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent purchases and/or redemptions of Shares. Cash purchases and/or redemptions of Creation Units, however, can result in increased tracking error, disruption of portfolio management, dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objectives, and may lead to the realization of capital gains. These consequences may increase as the frequency of cash purchases and redemptions of Creation Units by APs increases. However, direct trading by APs is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential consequences of frequent purchases and redemptions of Shares, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs the Fund incurs in effecting trades. In addition, the Fund reserves the right to not accept orders from APs that Innovator has determined may be disruptive to the management of the Fund or otherwise are not in the best interests of the Fund. For these reasons, the Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares.

Dividends, Distributions and Taxes

The Fund expects to declare and distribute all of its net investment income and its net realized capital gains, if any, at least annually. The Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

TAXES

The Fund intends to qualify as a “regulated investment company” under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes.

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

TAXES ON DISTRIBUTIONS

The Fund's distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gains dividends. Ordinary income distributions are generally taxed at your ordinary tax rate; however, as further discussed below, certain ordinary income distributions received from the Fund may be taxed at the capital gains tax rates. Generally, you will treat all capital gain dividends as long-term capital gains regardless of how long you have owned your Shares. To determine your actual tax liability for your capital gains dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such distributions may reduce your tax basis, which could result in you having to pay higher taxes in the future when Shares are sold, even if you sell the Shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional Shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% "Medicare tax." This tax generally applies to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on Shares that are attributable to qualifying dividends received by the Fund from certain corporations may be reported by the Fund as being eligible for the dividends received deduction.

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% for taxpayers in the 39.6% tax bracket, 15% for taxpayers in the 25%, 28%, 33% and 35% tax brackets and 0% for taxpayers in the 10% and 15% tax brackets. Some capital gains dividends may be taxed at a higher maximum stated tax rate. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Shares to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your Shares at a loss after holding it for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Code treats certain capital gains as ordinary income in special situations.

Ordinary income dividends received by an individual shareholder from a regulated investment company such as the Fund are generally taxed at the same rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates.

TAXES ON EXCHANGE LISTED SHARES

If you sell or redeem your Shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your Shares from the amount you receive in the transaction. Your tax basis in your Shares is generally equal to the cost of your Shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Shares.

INVESTMENTS IN CERTAIN NON-U.S. CORPORATIONS

If the Fund holds an equity interest in any PFICs, which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. The Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, the Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, the Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution

requirement and would be taken into account for purposes of the 4% excise tax. Dividends paid by PFICs are not treated as qualified dividend income.

TAXES AND PURCHASES AND REDEMPTIONS OF CREATION UNITS

If you exchange securities for Creation Units you will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and your aggregate basis in the securities surrendered and the cash component paid. If you exchange Creation Units for securities, you will generally recognize a gain or loss equal to the difference between your basis in the Creation Units and the aggregate market value of the securities received and any cash redemption amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position.

Under current federal tax laws, any capital gain or loss realized upon redemption of Creation Units generally is treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less. If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares.

Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. See “Taxes” in the statement of additional information for more information.

Distribution Plan

Foreside Fund Services, LLC (the “*Distributor*”) serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in the Shares.

The Board of Trustees has adopted a Distribution and Service Plan (the “*Distribution Plan*”) pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to finance any activity primarily intended to result in the sale of Creation Units of the Fund or the provision of investor services, including but not limited to: (i) marketing and promotional services, including advertising; (ii) facilitating communications with beneficial owners of Shares; (iii) wholesaling services; and (iv) such other services and obligations as may be set forth in the Distribution Agreement with the Distributor, or a dealer agreement with a broker-dealer.

The Fund does not currently pay 12b-1 fees and there is no plan to impose such fees. However, in the event 12b-1 fees are charged in the future, because these fees are paid out of the Fund’s

assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Net Asset Value

The Fund's net asset value is determined as of the close of trading (normally 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for business. Net asset value is calculated for the Fund by taking the market price of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent, is the net asset value per Share. All valuations are subject to review by the Trust's Board of Trustees or its delegate.

The Fund's investments are valued daily in accordance with valuation procedures adopted by the Board, and in accordance with provisions of the 1940 Act. Certain securities in which the Fund may invest are not listed on any securities exchange or board of trade. Such securities are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over the counter secondary market, although typically no formal market makers exist. Certain securities, particularly debt securities, have few or no trades, or trade infrequently, and information regarding a specific security may not be widely available or may be incomplete. Accordingly, determinations of the fair value of debt securities may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may play a greater role in valuation of debt securities than for other types of securities. Typically, debt securities are valued using information provided by a third-party pricing service. The third-party pricing service primarily uses broker quotes to value the securities.

The Fund's investments will be valued daily at market value or, in the absence of market value with respect to any investment, at fair value in accordance with valuation procedures adopted by the Board and in accordance with the 1940 Act. Market value prices represent last sale or official closing prices from a national or foreign exchange (*i.e.*, a regulated market) and are primarily obtained from third-party pricing services.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Board of Trustees or its delegate at fair value. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Board and in accordance with the provisions of the 1940 Act. These securities generally include, but are not limited to, certain restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended (the "*Securities Act*")) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund's net asset value or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's "fair value." As a general principle, the current "fair value" of a security would appear to be the amount which the owner might reasonably expect to receive for the security upon its current sale. The use of fair value prices by the Fund generally results in the prices used by the Fund that may differ from current

market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. Valuing the Fund's securities using fair value pricing will result in using prices for those securities that may differ from current market valuations. See the Fund's statement of additional information for details.

Even when market quotations are available for portfolio securities, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer-specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the Exchange and when the Fund calculates its NAV. Events that may cause the last market quotation to be unreliable include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where Innovator determines that the closing price of the security is unreliable, Innovator will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security.

Index Information

The Index is owned and operated by Investor's Business Daily®. IBD is not affiliated with the Fund, Innovator or the Distributor. The Fund is entitled to use the Index pursuant to a sublicensing arrangement with Innovator, which in turn has a licensing agreement with the Index Provider. Thomson Reuters serves as calculation agent for the Index (the "*Index Calculation Agent*"). The Index Calculation Agent is responsible for the management of the day-to-day operations of the Index, including calculating the value of the Index every 15 seconds, widely disseminating the Index values every 15 seconds and tracking corporate actions, some of which result in Index adjustments.

Index Composition

Eligible Universe. The initial universe for the Index is composed of all U.S.-listed ETFs registered under the 1940 Act. Exchange-traded notes are not eligible for inclusion in the Index. All ETFs that utilize financial instruments to provide leveraged exposure to an index with the intent of seeking a multiple (positive or negative) on the returns of that index are removed from the selection universe. With the exception of the ProShares Short S&P 500 ETF, all ETFs that utilize financial instruments to seek a return that is the inverse of an index are removed from the selection universe as well. Additionally, commodity ETFs, ETFs structured as grantor trusts or partnerships and ETFs that invest principally in other ETFs are ineligible to be included in the Index.

Selection Universe. Securities are further narrowed into a "Selection Universe" by excluding those not meeting the following criteria:

1. Underlying Funds with an average daily trading volume of less than 100,000 over the previous 50 days;

2. Underlying Funds not trading above their average 6-month price; and
3. Underlying Funds with returns less than those of the S&P 500 Index over the course of the previous three months

The remaining ETFs are then ranked according to IBD's relative price strength rating methodology. This methodology measures the relative strength in price appreciation over the previous 12 months for the over 8,000 foreign and domestic equity securities that comprise IBD's internal database. Each Underlying Fund is ranked according to its relative price performance and assigned a proprietary rating score from 1 (lowest) to 99 (highest). All Underlying Funds with a qualifying rating are included and equally weighted within the Index subject to the limitations of Section 12(d)(1) of the 1940 Act (for additional information on the limitations of Section 12(d)(1), see "Fund Investments—Exchange-Traded Funds"). If less than three Underlying Funds have a qualifying rating, the Index will be composed of Underlying Funds that invest principally in cash or cash equivalents to bring the number of components to three until the next Index reconstitution and rebalance date. The Index will not have exposure to an Underlying Fund in an amount greater than 25% of that Underlying Fund's total shares outstanding.

The Index has also been designed to account for the tendency of Underlying Funds to exhibit mean reversion after periods of outsized price appreciation. Mean reversion is the assumption that an Underlying Fund's price will tend to move to the average price over time. Therefore, if the Index exhibits price appreciation exceeding an index level, determined by the Index Provider, above its average price over the previous 39 weeks, the Index will be composed of Underlying Funds that principally invest in cash or cash equivalents until the next Index reconstitution and rebalance date.

Under normal conditions, the Index will be reconstituted and rebalanced on the last trading day of each month. However, if the S&P 500 Index experiences gains of greater than 3% in a given week, the Index will be reconstituted and rebalanced on the final trading day of the week.

Disclaimers

The Fund is not sponsored, endorsed, sold or promoted by IBD ("*Licensor*"). Licensor makes no representation or warranty, express or implied, to the owners of the Fund or any member of the public regarding the advisability of trading in the Fund. Licensor's only relationship to Innovator is the licensing of certain trademarks and trade names of Licensor and of the IBD[®] ETF Leaders Index which is determined, composed and calculated by Licensor without regard to Innovator or the Fund, Licensor has no obligation to take the needs of Innovator or the owners of the Fund into consideration in determining, composing or calculating IBD[®] ETF Leaders Index. Licensor is not responsible for and has not participated in the determination of the timing of, prices at, or quantities of the Fund to be listed or in the determination or calculation of the equation by which the Fund are to be converted into cash. Licensor has no obligation or liability in connection with the administration, marketing or trading of the Fund.

LICENSOR DOES NOT GUARANTEE OR MAKE ANY REPRESENTATION OR WARRANTY AS TO THE ACCURACY AND/OR THE COMPLETENESS OF THE IBD[®] 50 INDEX OR ANY DATA INCLUDED THEREIN AND LICENSOR SHALL HAVE NO

LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN. THE INDEX, ANY DATA CONTAINED THEREIN AND ANY OTHER DATA OR INFORMATION SUPPLIED BY LICENSOR IS PROVIDED ON AN “AS IS” BASIS. LICENSOR MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY INNOVATOR, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE IBD[®] ETF LEADERS INDEX OR ANY DATA INCLUDED THEREIN. LICENSOR MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY, NON-INFRINGEMENT OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE IBD[®] ETF LEADERS INDEX OR ANY DATA INCLUDED THEREIN, OR ANY WARRANTIES WITH RESPECT TO THE TIMELINESS, SEQUENCE, ACCURACY, COMPLETENESS, CURRENTNESS, OR QUALITY OF THE INDEX, ANY DATA CONTAINED THEREIN OR ANY DATA OR INFORMATION SUPPLIED BY LICENSOR. LICENSOR SHALL NOT BE RESPONSIBLE FOR ANY MISDELIVERY OF ANY DATA RELATED TO OR ASSOCIATED WITH THE INDEX OR ANY DATA CONTAINED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL LICENSOR HAVE ANY LIABILITY FOR ANY LOST PROFITS OR INDIRECT, PUNITIVE, SPECIAL OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES. LICENSOR AND ITS RESPECTIVE AFFILIATES AND EACH OF THEIR RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, AGENTS AND SOURCES (THE “LICENSOR PARTIES”) SHALL NOT BE LIABLE TO INNOVATOR OR ANY THIRD PARTY FOR ANY LOSS OR DAMAGE, DIRECT, INDIRECT OR CONSEQUENTIAL, ARISING FROM (A) ANY INACCURACY OR INCOMPLETENESS IN, OR DELAYS, INTERRUPTIONS, ERRORS OR OMISSIONS IN THE DELIVERY OF THE INDEX OR ANY DATA CONTAINED THEREIN, OR (B) ANY DECISION MADE OR ACTION TAKEN BY INNOVATOR OR ANY THIRD PARTY IN RELIANCE UPON THE PRODUCTS, INDEX OR ANY DATA CONTAINED THEREIN. THERE ARE NO THIRD-PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN LICENSOR AND INNOVATOR.

Fund Service Providers

US Bancorp Fund Services LLC is the administrator and transfer agent for the Trust. U.S. Bank, N.A. serves as the custodian for the Trust.

Chapman and Cutler LLP, 111 West Monroe Street, Chicago, Illinois 60603, serves as legal counsel to the Trust.

Cohen & Company, Ltd. serves as the Trust’s independent registered public accounting firm and is responsible for auditing the annual financial statements of the Trust

Financial Highlights

The Fund is new and has no performance history as of the date of this prospectus. Financial information therefore is not available.

Premium/Discount Information

The market prices of the Shares generally will fluctuate in accordance with changes in NAV, as well as the relative supply of and demand for Shares on the Exchange. Innovator cannot predict whether the Shares will trade below, at or above their NAV. The approximate value of the Shares, which is an amount representing on a per share basis the sum of the current market price of the securities (and an estimated cash component) accepted by the Fund in exchange for Shares, will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved with, or responsible for, the calculation or dissemination of the approximate value, and the Fund does not make any warranty as to its accuracy.

Information regarding how often the Shares traded on the Exchange at a price above (at a premium) or below (at a discount) the NAV of the Fund during the past four calendar quarters, when available, will be found at www.innovatoretfs.com.

Investments by Other Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares. Although the Securities and Exchange Commission has granted an exemptive order to the Trust permitting registered investment companies that enter into a participation agreement with the Trust (“*Investing Funds*”) to invest in Innovator Funds beyond the limits set forth in Section 12(d)(1) of the 1940 Act subject to certain terms and conditions, the exemptive order is not applicable to investments in the Fund. Accordingly, Investing Funds must adhere to the limits set forth in Section 12(d)(1) of the 1940 Act when investing in the Fund.
