IJUN (Principal U.S. Listing Exchange: NYSE ARCA)

Annual Shareholder Report | October 31, 2024

This annual shareholder report contains important information about the Innovator International Developed Power Buffer ETF™ - June for the period of May 31, 2024, to October 31, 2024. You can find additional information about the Fund at <https://www.innovatoretf.com/etf/?ticker=IJUN>. You can also request this information by contacting us at 800.208.5212.

## WHAT WERE THE FUND COSTS FOR THE PAST YEAR?\*

 (based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Innovator International Developed Power Buffer ETF - June	\$35	0.85%

\* Expense ratio is annualized. Amount shown reflects the expenses of the Fund for the current reporting period.

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Fund seeks to match the price return of the iShares MSCI EAFE ETF (EFA) up to a stated upside Cap, while limiting downside losses to EFA by the amount of its stated Buffer over the course of the Outcome Period. Because the period contemplated herein does not align with the Outcome Period of the Fund, the Fund's performance stated over the period covered by this report does not reflect the implementation of the Fund's investment strategy for the full Outcome Period.

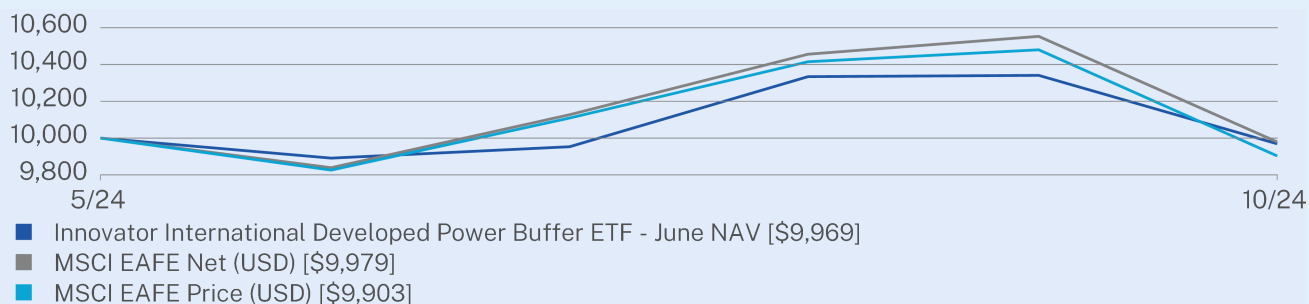

In markets where the MSCI EAFE Index is down, the risk mitigation attributes of the stated Buffer provide an opportunity for the Fund to soften market losses during the reporting period and outperform the MSCI EAFE Index. Alternatively, in markets where the MSCI EAFE Index is appreciating, the risk mitigation attributes of the Buffer may limit the upside performance over the reporting period by virtue of the Fund's Cap, which limits the amount of potential Fund gains and represents the absolute maximum return that the Fund can achieve for its Outcome Period. The effect of the Cap and the Buffer will also cause the Fund to experience different returns than EFA.

The MSCI EAFE Index delivered strong performance for the year ended October 31, 2024. Gains were supported by a stabilization in global economic activity and resilient corporate earnings, particularly in developed markets outside the U.S. However, rising geopolitical tensions and persistent monetary policy tightening in several regions introduced periods of heightened volatility. During Q3 2024, easing inflation concerns and improved investor sentiment bolstered returns, though these gains were tempered later in the period by renewed concerns over a potential economic slowdown in the Eurozone and mixed economic data. Overall, the MSCI EAFE Index demonstrated resilience in navigating a challenging macroeconomic environment.

## HOW DID THE FUND PERFORM SINCE INCEPTION?\*

The \$10,000 chart reflects a hypothetical \$10,000 investment. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees, were deducted.

### CUMULATIVE PERFORMANCE (Initial Investment of \$10,000)
