SPY: SPDR® S&P 500® ETF Trust

QQQ: Invesco QQQ Trust

IWM: iShares Russell 2000 ETF

EFA: iShares MSCI EAFE ETF

Upside/downside refers to the fund's upside and downside participation levels, to a cap, of the reference asset.

The funds only seek to provide their investment objective, which is not guaranteed, over the course of an entire outcome period. Investors who purchase shares after or sell shares before the end of an outcome period will experience very different outcomes than the funds seek to provide. **The Funds have characteristics unlike many other traditional investment products and may not be suitable for all investors. For more information regarding whether an investment in the Funds is right for you, please see "Investor Suitability" in the prospectus.**

IMPORTANT DEFINITIONS AND DISCLOSURES

BUFFER ETFs™: The Fund only seek to provide shareholders that hold shares for the entire Outcome Period with their respective buffer level against reference asset losses during the Outcome Period. You will bear all reference asset losses exceeding the buffer. Depending upon market conditions at the time of purchase, a shareholder that purchases shares after the Outcome Period has begun may also lose their entire investment. For instance, if the Outcome Period has begun and the Fund has decreased in value beyond the pre-determined buffer, an investor purchasing shares at that price may not benefit from the buffer. Similarly, if the Outcome Period has begun and the Fund has increased in value, an investor purchasing shares at that price may not benefit from the buffer until the Fund's value has decreased to its value at the commencement of the Outcome Period.

Fund shareholders are subject to an upside return cap (the "Cap") If the Outcome Period has begun and the Fund has increased in value to a level near to the Cap, an investor purchasing at that price has little or no ability to achieve gains but remains vulnerable to downside risks. Additionally, the Cap may rise or fall from one Outcome Period to the next. The Cap, and the Fund's position relative to it, should be considered before investing in the Fund.

The ETFs can be held indefinitely, resetting at the end of each outcome period. There is no guarantee 0125 ETF_PL-LISTED

the funds' will achieve their investment objective. Investing involves risk, including possible loss of principal.
